A bit difficult to set up on Bazzite (managed to Google-fu all the errors), but it absolutely works! All items came new and undamaged and it's pretty easy to set up. I managed to tune into FM music stations and an AM marine forecast frequency using GQRX. Cheap way to get into Software-Defined Radio if you only need RX capability.

g***r (1011) · Past month — Verified purchase
This is an amazing radio receiver that can be used on a computer. Lots of good documentation on their website and very easy to install drivers and software. Works really well with less than 15 minutes of set-up time! Purchase the antenna kit and FM bandpass filter as well for better results outside the FM band. Seller had great advice as well!

This RTL-SDR Blog Multipurpose Dipole Antenna Set is simply excellent. The materials are solid and well-made, and the kit includes all the essential parts you need. It feels professional and thoughtfully designed. What I really appreciate is the flexibility — it supports a wide range of frequencies, and the modular design makes it easy to adjust or reposition. The included cables and mounts are also of surprisingly good quality. Perfect for anyone looking for a reliable and compact antenna kit

s***o (225) · Past year — Verified purchase
Quality: 100% Condition: 100% Value: 100% Appearance: 100% I bought this to use on my newly purchased SDRPlay 1A. I will never buy an RTLSDR v3anything as it overheats like crazy, however this antenna pack works perfectly on my new SDRPlay 1A, which came without any antennas. I would recommend this to anyone who needs an SMA antenna that can receive on multiple frequencies rather than a narrow range. I think this product is good and if I get a new radio sometime I'll buy this again possibly.

c***n (8) · Past 6 months — Verified purchase
Great value product, build quality was perfect for my applications and I think it will be reliable. Well packaged and arrived in good condition. Thanks! Look forward to doing business again.

G***i (39) · Past 6 months — Verified purchase
Great quality, fast shipping, good value, and a high quality product.

h***9 (31) · Past 6 months — Verified purchase
Good quality, wide range of uses, useful, simple, practical. ;-)

c***o (153) · Past month — Verified purchase
Todo correcto, articulo, vendedor, envió, ...etc. Nada mas que decir, no me esperaba menos al tratarse del canal oficial. Volveré a comprarles sin ninguna duda!

TOP FAVORABLE REVIEW

Money well spent.

This is a reasonably robust and versatile pocket aerial kit with RTL-SDR (or similar) dongles in mind. The choice of mounting options allows the dipole to be put practically anywhere, in any orientation, and the choice of elements allows the upper frequency ranges of the dongle to be fully explored. Works well with VHF airband and 144 MHz amateur band, but the (separately sold) FM broadcast blocking filter amy be essential in some areas. Strongly recommend as startup kit for the wonderful world of SDR.

Radio antenna

It is a fairly complete set of dipoles with two pairs of antenna, an extension cable and two mountings. The only addition I would have liked would be an adaptor for a common co-ax aerial cable. A good quality product.

Decent but it could be better

Generally decent but inexpensive construction. Does not feel like it will last a long time. The first time I extended one of the antennas the last section came completely loose from the rest. This was with gentle handling.

Works Great

It works great easy to use and install allows for directional along with radiant signals. It comes with multiple lengths so it can be used for multiple frequency ranges.
